

ON-ROAD REFUELING CONTROL WITH eFUEL

No Cash | No Cards | Peace of Mind

Transit Solutions' On-Road Fuel and Fleet Management Solutions enable the effective management of on-road fuel spend through our nationwide eFuel Network of retail forecourts, enabling refueling of fleet vehicles without cash or card payments.

Enjoy the peace of mind provided by eFuel by fitting your fleet with Automatic Vehicle Identification (AVI) technology and utilising the network for your refueling operations or share in the additional volumes that the eFuel network has to offer by fitting your retail forecourt with eFuel eAsy or eFuel eXtra technologies.

- > Eliminates human intervention, ensuring that the fuel you are paying for is in fact received.
- > Accuracy of information is noticeably improved; allowing further control measures to be implemented.
- > Vehicle is responsible for payment and not the driver.
- > Enhanced control as you enjoy accountability for every drop.
- > Preauthorisation takes place at the pump before any fuel is dispensed.

HOW DOES IT WORK?

Automatic Vehicle Identification (AVI) technology facilitates automated, card free fueling at participating retail service stations which is widely used in South Africa and Namibia by more than 50 000 government, parastatal and commercial fleet vehicles.

It is facilitated by Chevron (Caltex), Engen and Total at over 800 service stations under the brand "eFuel" which is a proprietary registered trade mark owned by these Companies.

EFUEL EASY

AUTHORISATION:

Decreases fuel expenses and fraud by fueling only authorised vehicles.

ALERTS:

Easily controls, tracks and manages fleet consumption as well as refueling activity with alerts on irregular fueling or consumption patterns.

SET RULES AND LIMITS:

Define vehicles, set limits and restrictions.

SECURITY:

Eliminate risks with a patented removal protection mechanism to eliminate theft or fraud.

NO HUMAN INTERVENTION:

Eliminate human intervention and obtain accurate information and data.

SECURE:

Pre-authorisation takes place at the pump before fuel is dispensed.

eFuel eAsy forms

part of our Fleet Solutions

and ensures that the fleet vehicle is identified on the forecourt and that fuel can only be dispensed into an authorized fleet vehicle. Odometer is inputted by the forecourt attendant.

eFuel ensures that fuel is dispensed into authorised assets only and offers the following features:

- Network of 800+ eFuel equipped retail service stations in South Africa.
- AVI technology (radio frequency identification) communication.
- Automatically captures value of fuel dispensed, volume of fuel dispensed, location, registration number of vehicle, date of transaction, time of transaction and prompts for an odometer reading (manual input at time of refueling).
- 24-hour Help-Desk service.
- Multiple oil company branded solution for widest footprint and 24-hour availability.

EFUEL EXTRA

AUTHORISATION:

Decreases fuel expenses and fraud by fueling only authorised vehicles.

ALERTS:

Easily controls, tracks and manages fleet consumption as well as refueling activity with alerts on irregular fueling or consumption patterns.

AUTO GENERATED ODOMETER READINGS:

Automatically Generated Odometer Reading and access to vehicle location data.

SECURITY:

Eliminate risks with a patented removal protection mechanism to eliminate theft or fraud.

NO HUMAN INTERVENTION:

Eliminate human intervention and obtain accurate information and data.

SECURE:

Pre-authorisation takes place at the pump before fuel is dispensed.

eFuel eXtra not only provides automated capturing of odometer readings, it also uses the AccuTrip+ to enables the access of trip data and vehicle location, together with all the benefits of eFuel.

- Network of 800+ eFuel equipped retail service stations in South Africa.
- Independent GPS odometer reading.
- Accurate vehicle odometer readings independent of vehicle factors, allowing remote resetting to align to vehicle actuals.
- Trip start and end readings
- Automatically captures value of fuel dispensed, volume of fuel dispensed, location, registration number of vehicle, date of transaction, time of transaction and odometer reading.
- 24-hour Help-Desk service.
- Multiple oil company branded solution for widest footprint and 24-hour availability.
